

LIEBHERR™ Oil Analysis

Keeps your machines running longer

BENEFITS AND ADVANTAGES:

LIEBHERR™ Oil Analysis only requires you to take a small sample of the oil from each component being monitored. You are provided with clear and concise directions, paper and on-line forms and sample bottles needed to submit samples to the LIEBHERR™ laboratory.

Continuous oil condition monitoring with the aid of the Liebherr oil analysis program gives you better control over the condition of your engine, hydraulic and power train components.

Mechanical and fluid related problems are recognized at an early stage, so that consequential damage is avoided and premature oil change is prevented.

Studies show that you receive a 10 to 1 payback on the amount of money saved on repair costs compared to the amount invested in an oil analysis program. Some of the benefits of the program include:

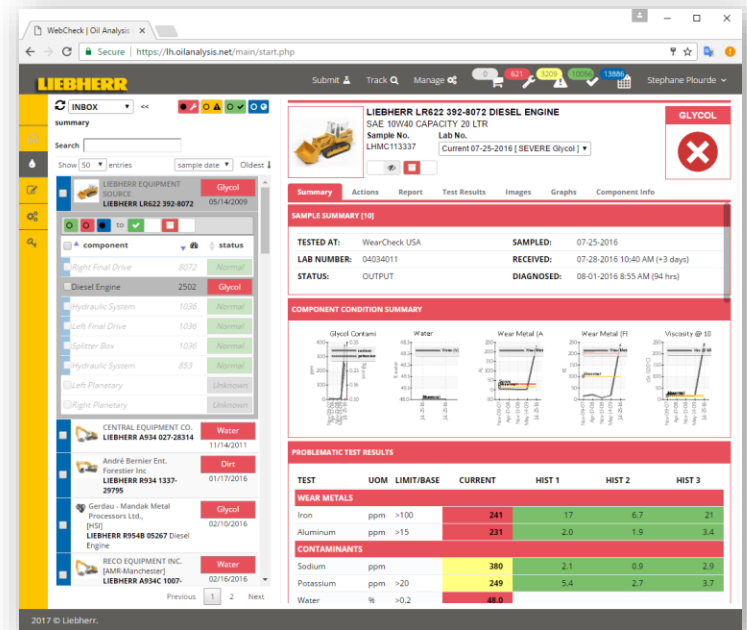

- Maximized oil change intervals.
- Validation of warranty claims.
- Early identification of potential damage to avoid machine failure.
- Knowledge of the true condition of the machine without having to dismantle and inspect the machinery.
- Avoidance of expensive repair and machine downtime.
- Reduced frequency of oil change reducing burden on the environment.

The Liebherr Oil Analysis program provides you with an expert interpretation of the oil analysis results and useful maintenance recommendations summarized on a specially developed Liebherr oil sample report.

LIEBHERR™ Oil Analysis

LIEBHERR™ On-Line - Cloud-Based Oil Analysis
Login to the LIEBHERR™ On-Line system to gain access to all current and historical oil analysis results & reports. With LIEBHERR On-Line you can:

- Submit and track oil analysis samples
- On-line data entry
- Manage your machine database
- Set alarms
- Manage sampling schedules
- Generate dashboard summaries
- Produce management reports

ORDERING INFORMATION:

LIEBHERR™ oil analysis sample kits come in a carton of 12 kits. Each carton includes a pre-addressed pre-paid courier form, sample information forms (alternatively samples can be registered on-line), sample bottles and a courier bag. All sample kits include oil analysis testing, diagnosis and interpretation, sample report and access to LIEBHERR™ On-Line.

Product	Part Number
Single Oil Sample Kit	LH-MOB1+
Carton 12 Oil Sample Kits	LH-MOB1+-12
Oil Sample Pump	SP38X
Oil Sample Tubing (per foot) PT44
