

Contamination Control

LUBRIGARD STAND-ALONE AND PORTABLE DEPTH FILTRATION SYSTEMS PROVIDE YOU WITH THE ULTIMATE SOLUTION FOR BOTH IMPROVING AND MAINTAINING OIL CLEANLINESS.

BENEFITS

The TC Series of filtration systems represent the highest quality and most rugged systems available for purifying all types of industrial oils. These heavy-duty systems are capable of removing particles and/or free water from all types of oil—even high viscosity gear oils—and are designed for years of dependable service.

The TC Series is available in a wide range of pumping speeds and can be configured to meet the needs of almost any specific application.

- Heavy duty
- Easy-to-change filters
- Works with varied sizes of high capacity microglass, depth, water removal and molecular sieve elements

OVERVIEW

- Purifying turbine lube oil systems
- Filtering hydraulic systems
- Cleaning transformer oil
- Filtering gear boxes
- Almost any industrial equipment containing oil

LUBRIGARD

Choosing a Filtration System:

Cart

A cart is generally used in applications with multiple reservoirs of the same oil type being filtered. One machine can filter several reservoirs, lowering costs.

T-Stand

A T-stand is usually the best choice for improving equipment reliability. This is a permanently installed and always-on filtration system that cleans the oil and then *keeps* the oil clean.

Spin-On Panel

This system is designed for small reservoirs, typically up to 25 gallons and for lower viscosity oils, generally up to 150 cst. A spin-on panel system will be permanently installed and can offer “always-on” filtration.

Product Features:

Canisters	Heavy-duty, industrial style with bolt-down lids and heavy gauge cylinder walls. These canisters can accept various size high-capacity microglass, depth, water removal and molecular sieve elements and can be changed very easily
Pump	Heavy-duty gear pump
Motor	Washdown, heavy duty
Frame	Heavy-duty rectangular tubing
Switch	NEMA 4 industrial-duty
Viscosity Range	Up to ISO 680
Wheels	16” solid rubber
Lifting Eye Bolts	Allows for easy lifting and maneuverability
Hoses	Steel braid reinforced hoses designed specifically for oil
Gauges	Pump pressure and differential pressure gauges
