

# Label Safe® Labeling System

Lubricant Identification from Bulk to Point of Use

## Labeling System

HIGHLY VISUAL, SIMPLE AND RELIABLE, THE LABEL SAFE ADVANCED LABELING SYSTEM ENSURES THE RIGHT LUBRICANT GOES INTO THE RIGHT MACHINE EVERY TIME.

### BENEFITS

#### Improve Lubrication Practices

Highly visual, simple and reliable, the LABEL SAFE Advanced Labeling System ensures the right lubricant goes into the right machine every time. Specially designed for industry, LABEL SAFE is high quality and suitable for outdoor use and is the only industrial grade labeling system in the world that enables accurate and consistent lubricant identification on containers, machinery, vehicles and more. The fully integrated and color-coded system improves productivity and efficiency enabling operators to find what they need when they need it, while ensuring no misapplication of fluids occurs.

#### Improve Quality

Eliminate the risk of contamination — since containers can be properly identified. Clean oil leads to greater production cycle consistency as machinery runs more efficiently and generates the output levels a company needs.

#### Act Environmentally

Make OSHA and Employee Right to Know information readily available on or near machinery, containers, or other items. Ease concerns you may have — display data in a convenient, practical and protected way.

#### Reduce Costs

The bottom line is impacted by improper labeling of lubricants — pouring the wrong fluid into the wrong machine can be costly, and containers that aren't labeled properly may end up being discarded. LABEL SAFE helps reduce waste which increases bottom line savings through accurate and consistent delivery of fluids.

#### Improve Safety

Clear and durable Label Pockets make MSDS information easily accessible. The fully integrated and color-coded system ensures operators can safely and accurately access the data they need, when they need it.

#### Integrate Your Lubrication Tools

The LABEL SAFE™ Advanced Labeling System joins OIL SAFE® and GREASE SAFE® as a portfolio of products that combine to form a revolutionary solution for managing lubricants from bulk storage to points of use.

### OVERVIEW

- Ensures the right lubricant goes into the right machine every time.
- Improves OSHA compliance
- Accommodates inclusion of MSDS at all steps of the lubrication process
- Enables consistent identification of bulk storage, intermediate container and point of use
- Is flexible and suitable for multiple work place applications
- Is industrial grade, high quality and suitable for outdoor use
- Improves productivity and efficiency
- Increases bottom line savings

# Label Safe® Labeling System

Lubricant Identification from Bulk to Point of Use

## Evaluation Kit

Evaluation Kit provides a complete cross-section of the LABEL SAFE™ product range. Enables users to determine the components they need as well as how components combine into one integrated system.

Evaluation Kit **290001**

## Label Pocket™

Double-sided pocket accommodates Content Labels and card stock and provides ample space for comprehensive identification information on containers and equipment. Available in larger size for MSDS and other information.

2" X 3.5" Clear (fits frame) **200101**  
4" X 3.5" Clear (for MSDS) **200102**

## Drum Ring™

Attach industrial-grade drum ring around neck of OIL SAFE® containers. Use with multiple label pockets and a color-coded frame for container and fluid identification.

Drum Ring **201001**

## Label Pocket Frame™

Industrial-grade frames protect and color code label pockets connect to equipment via LABEL SAFETM magnets or clamps or to OIL SAFE® containers via LABEL SAFE™ drum rings.

## Label Leash™

For attaching pockets to machinery, piping and other fittings. Use individually or make a longer leash by connecting multiple leashes together to suit your applications. Unlike cable ties for affixing labels, the leash can be easily removed and reused.

Label Leash **202001**

## Label Magnet™

High strength, custom-built magnets fix label pockets and color-coded label frames to bulk fluid barrels, totes, storage racks, machinery, equipment, or any metal surface.

Label Magnet **203001**

## ID Washer Label Clamp™

LABEL CLAMP couples to any LABEL SAFETM Color-Coded Fluid Point ID Washer, enabling comprehensive equipment fill-point identification. Clamp in a LABEL POCKET and LABEL POCKET Frame, if desired.

ID Washer Clamp **204001**

## Fill Point ID Washer™

FILL POINT WASHERS are temperature and chemical resistant. They enable color-coded identification of machine-oil and grease nipple fill points as well as a label-spring clamp, pocket, and frame to be positioned at the point of use.
