

SHORTER TROUBLESHOOTING TIME

SAVE TIME AND MONEY

Besides helping you plan your maintenance, a Volvo Penta oil analysis also provides significant advantages in connection with repairs.

The time required for repairs is reduced when an oil analysis points the way to the cause of the problem. The shortest possible troubleshooting time means your engine is back in operation sooner.

To order your
**Volvo Penta Oil Analysis
starter kit and parts:**

Oil Analysis Starter Kit

Includes 5 sample bottles, hoses, vacuum pump and instructions

Part Number - 21616535

Oil Sampling Bottles*

VOLVO PENTA

VOLVO PENTA OIL ANALYSIS HELPS YOU STAY ONE STEP AHEAD AND AVOID UNPLANNED DOWNTIME

actions better than anyone else. Regular analyses make trends visible, and bring even better control to engine health management.

SIMPLE, FAST AND CRYSTAL CLEAR

Oil analysis is carried out in three stages:

◆ The Sample

The necessary samples are taken and sent to a Volvo Penta laboratory.

◆ The Analysis

Our laboratories have ultra modern, advanced diagnostic equipment and experienced, qualified personnel. They analyze the samples and collate a great amount of data including water/coolant content, viscosity, fuel, contaminants, the amount of metallic particles and more.

◆ The Diagnosis

The results of the rigorous analysis are soon made available. The diagnosis provides immediate recommendations for actions so that critical situations can be avoided.

The oil analysis is a valuable document that confirms your engine's condition and raises its second-hand value.

PLAN YOUR ENGINE MAINTENANCE

Volvo Penta oil analysis is an unbeatable tool that not only allows you to plan your maintenance but also reduces the risk of unplanned downtime and expensive repairs.

Simply put, oil analysis is a basic driveline "health check". The analysis provides early warnings which make possible the timely replacement of components before problems appear and damage occurs.

Our oil laboratories are repositories of knowledge and expertise about Volvo Penta products and are able to interpret and analyze results, recommending suitable
