

WEAR NORMAL CONTAMINATION NORMAL FLUID CONDITION NORMAL

Locomotives

2008 Component Railway diesel Fluid RAILWAY ENGINE OIL SAE 40 (243 GAL)

RECOMMENDATION

Resample at the next service interval to monitor. Please specify the component make and model with your next sample. Please contact your representative for information regarding the proper sampling kits for your service. NOTE: We recommend using MOB 3 test kits, this testkit includes Analytical Ferrography which provides a detailed morphological analysis of wear particles present in the fluid. this testkit includes BN to determine the suitability of the oil for continued use.

WEAR

Component wear rates appear to be normal (unconfirmed).

CONTAMINATION

There is no indication of any contamination in the oil.

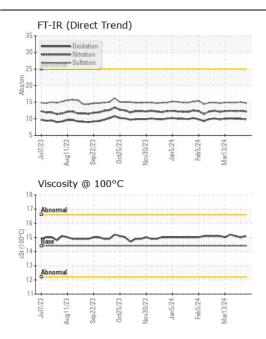

.....

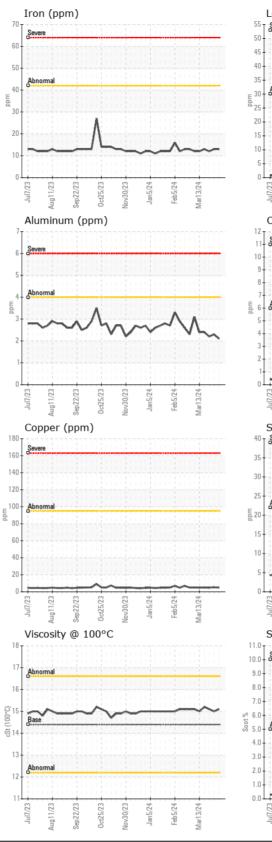

FLUID CONDITION

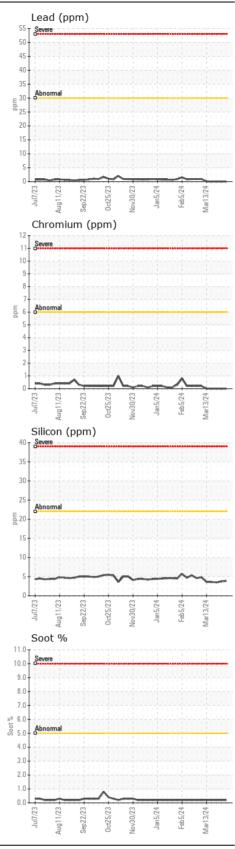

The condition of the oil is acceptable for the time in service (unconfirmed).
