

# WEAR NORMAL CONTAMINATION NORMAL FLUID CONDITION NORMAL

#### Machine Id **MWP** Component **Port Reduction Gear** Fluid **{not provided} (--- GAL)**

RECOMMENDATION

Little or no information is provided as to the component and lubricant being tested. Recommendations are therefore generic in nature and may not apply to the current application. Please forward information as to equipment type, reservoir capacity, lubricant type and any pertinent information to allow for a more accurate assessment. Resample at the next service interval to monitor. NOTE: Please provide information regarding reservoir capacity, filter type and micron rating with next sample. Please specify the brand, type, and viscosity of the oil on your next sample.

.....

#### WEAR

All component wear rates are normal.

## CONTAMINATION

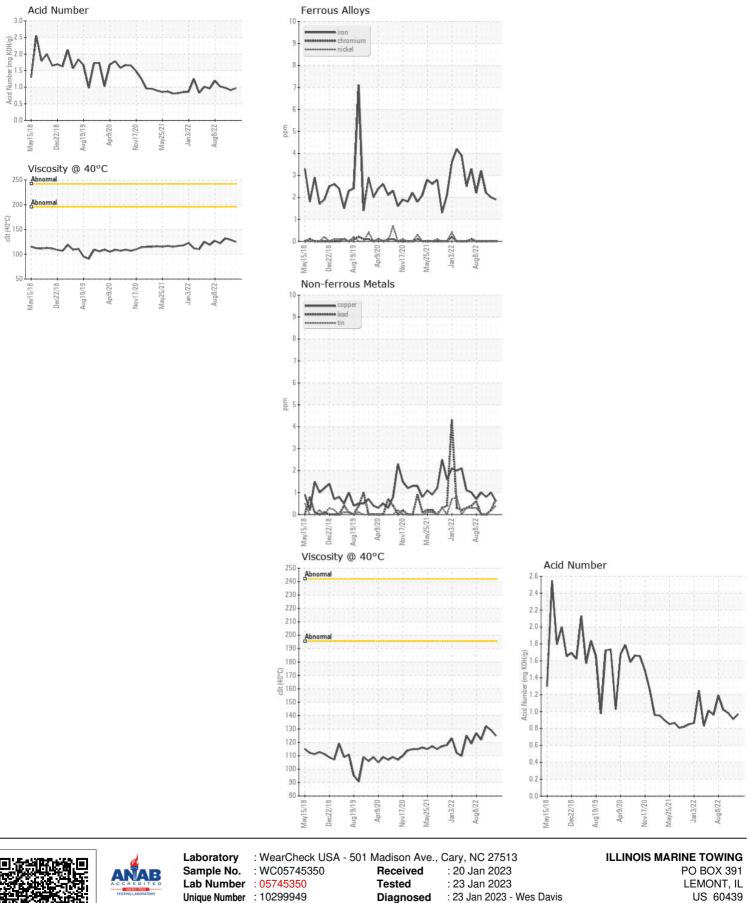

There is no indication of any contamination in the oil.

### **FLUID CONDITION**

The AN level is acceptable for this fluid. The condition of the oil is suitable for further service.
