ACID NEUTRALIZATION HYDRAULIC

HYDRAULIC UNIT ON SLUDGE CONVEYOR FILTER PRESS (S/N 16-6520-0122)

Tank Hydraulic System

ESSO NUTO H ISO 46 (--- GAL)

RECOMMENDATION

Check seals and/or filters for points of contaminant entry. The air breather requires service. If unrated, we recommend that you rep with a suitable micron rated and/or desiccant air breather. If rated recommend that you service/replace the breather. We recommend service the filters on this component. Resample in 30-45 days to monitor this situation. NOTE: Please provide information regardin reservoir capacity, filter type and micron rating with next sample.

CONTAMINATION

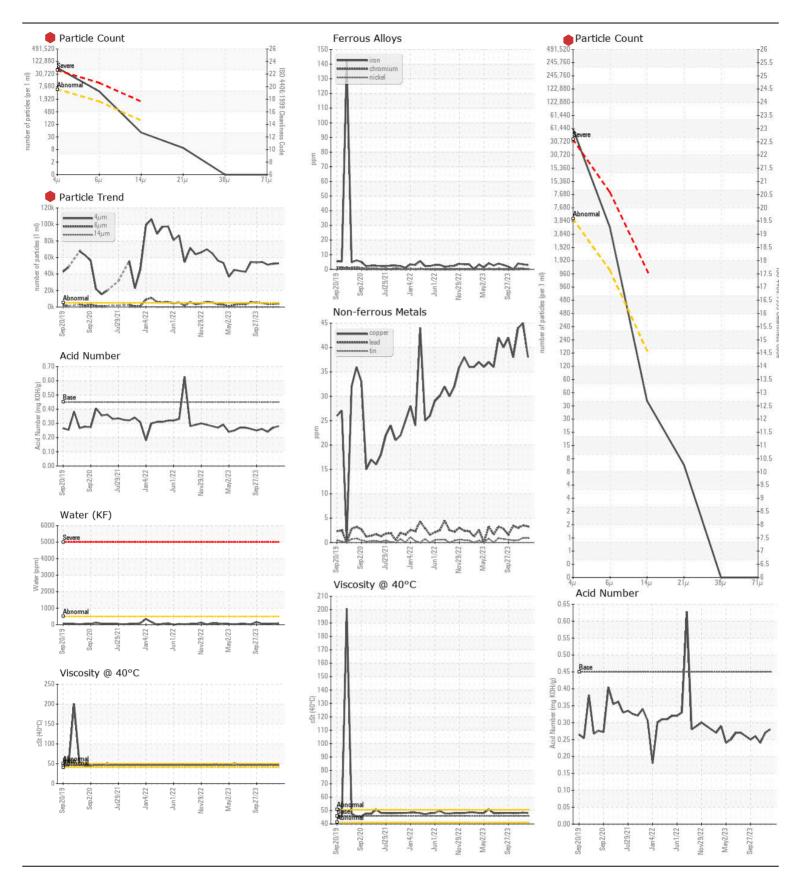

There is a high amount of silt (particulates < 14 microns in size) present in the oil. The water content is negligible. The system cleanliness code is much higher than the acceptable limit for the target ISO 4406 cleanliness code.

UID CONDITION

The AN level is acceptable for this fluid. The oil is still serviceable provided that the contaminant(s) can be reduced to acceptable levels.
