| We advise that you check the fuel injection system. We recommend that you drain the oil from the component if this has not already been done. We recommend an early resample to monitor this condition. | Sample Number | | Client Info | | GFL0116382 | GFL0098780 01 Feb 2024 | GFL009878 |

| The BN result indicates that there is suitable alkalinity remaining in the oil. Fuel is present in the oil and is lowering the viscosity. The oil is no longer serviceable due to the presence of contaminants. | Barium | ppm | ASTM D5185m | | 0 | 0 | 0 |
