| | Historical Comments |
|----------|--|
| 07/30/19 | The fluid appears in good condition. All critical parameters are within optimal ranges. |
| 12/03/14 | Routine Monitoring - no action required at this time. Resample again in 12 months. |
| 10/23/13 | Resample at the next service interval to monitor. WearCheck recommends using HTTFL sample kits for heat transfer fluids. Please contact us at 1-800-268-2131 and provide a purchase order for \$245 + HST in order to conduct additional testing (boiling points @ 10%, 50%, and 90%, percent boiling < 335°C, and solids) to determine the suitability for continued use. (not applicable) There is no indication of any contamination in the component(unconfirmed). There is no indication of any contamination in the component. The condition of the fluid is acceptable for the time in service (unconfirmed). |
| 11/10/11 | All the properties tested indicate the fluid appears to be in great condition at this time. No action required other than re-sample in 6-9 months. |
