

[7-11-064-04W6M] KARR HEAT MEDIUM

Customer: PTRHTF20207	System Information	Sample Information
Arc Resources	System Volume: 230000 ltr	Lab No: 02518126
Grande Prairie, AB T8V 8H7 Canada	Bulk Operating Temp: 302F / 150C	Analyst: Clinton Buhler
Attn: Jamie Lawson	Heating Source:	Sample Date: 10/12/22
Tel: (250)262-8656	Blanket:	Received Date: 10/24/22
E-Mail: jlawson@arcresources.com	Fluid: PETRO CANADA CALFLO AF	Completed: 10/27/22
	Make: BROACH	Clinton Buhler
		Clinton.Buhler@HFSinclair.com

Recommendation: Sample results indicate that the fluid is in suitable condition for continued service. Please re-sample in 12 months.

Comments:

Elemental analysis results (above) in parts per million (ppm). [10,000 ppm = 1.0%]

Historical Comments

01/24/22	Sample results indicate that the fill of Calflo AF is in suitable condition for continued service. Please note slight increase in Fe content. Fluid parameters do not appear to indicate any proclivity towards corrosion. Please re-sample in 6 months
01/18/21	Sample results indicate that the fluid is in suitable condition for continued service. Please re-sample in 6 months.
10/19/20	sample results indicate the fluid is suitable for continued service. Iron at 17 ppm which may be related to new construction. Silicon and Sodium are very low, but may represent dirt/dust and water from construction. Please re-sample in 1-3 months to build a trend on the new fluid.
11/13/19	Sample results indicate that the heat transfer fluid is suitable for continued service. Increase in water content, solids and Acid Number may indicate a sample drawn from a low spot. Please purge sample valve and piping thoroughly each time before taking a sample. Consider venting of system of low boiling vapors when site conditions allow. Please re-sample at next interval. (GCD) 90% Distillation Point is marginally low.
