Zinc	ppm	27	62	42	40
Phosphorus	ppm	1029	1203	1154	1065
Barium	ppm	13	74	78	86
Boron	ppm	3	2	2	3

Diagnosis

We recommend that you drain the oil from the component if this has not already been done. We advise that you inspect for the source(s) of wear. We recommend an early resample to monitor this condition. The copper level is severe for time on oil. Bearing and/or bushing wear is indicated. There is no indication of any contamination in the oil. The oil is no longer serviceable as a result of the abnormal and/or severe wear.
