## **RECOMMENDED ACTIONS**

There are no recommended actions for this sample.

## HISTORICAL DIAGNOSIS

## 22 Jan 2023 Diag: Jonathan Hester

#### VISCOSITY

Resample at the next service interval to monitor. All component wear rates are normal. The water content is negligible. The amount and size of particulates present in the system are acceptable. The oil viscosity is higher than normal. The AN level is acceptable for this fluid.

## 30 Sep 2021 Diag: Don Baldridge

#### VISCOSITY

Resample at the next service interval to monitor. All component wear rates are normal. The water content is negligible. The amount and size of particulates present in the system are acceptable. The oil viscosity is higher than normal. The AN level is acceptable for this fluid.

### 30 Jun 2021 Diag: Don Baldridge

#### NORMAL

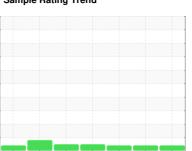

Resample at the next service interval to monitor. All component wear rates are normal. The water content is negligible. There is no indication of any contamination in the oil. The amount and size of particulates present in the system are acceptable. The AN level is acceptable for this fluid. The condition of the oil is suitable for further service.

## **DIAGNOSIS**

### Recommendation

Resample at the next service interval to monitor.

#### Wear

All component wear rates are normal.

### Contamination

The water content is negligible. The amount and size of particulates present in the system are acceptable.

### ▲ Fluid Condition

The oil viscosity is higher than normal. The AN level is acceptable for this fluid.
