

## **OIL ANALYSIS REPORT**

#### Sample Rating Trend

### Component **Diesel Engine** DIESEL ENGINE OIL SAE 10W30 (--- QTS)

#### DIAGNOSIS

#### Recommendation

Resample at the next service interval to monitor. Please specify the component make and model with your next sample. Please specify the brand, type, and viscosity of the oil on your next sample.

#### Wear

All component wear rates are normal.

#### Contamination

Elevated aluminum (Al) and/or lead (Pb) and potassium (K) levels in your metals analysis are likely a result of solder flux release into the lubricant and is common on new equipment/components. There is no indication of any contamination in the oil.

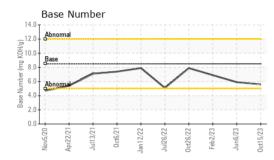

#### Fluid Condition

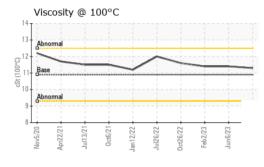

The BN result indicates that there is suitable alkalinity remaining in the oil. The condition of the oil is suitable for further service.
