Diagnosis

Recommend drain oil if not already done and flush before refilling with oil. We advise that you inspect for the source(s) of metal. We recommend an early resample to monitor this condition. Moderate concentration of visible metal present. All component wear rates are normal. There is a high amount of particulates present in the oil. The condition of the oil is acceptable for the time in service.

Depot: VPSENNOR
Unique No: 10609067
