DIAGNOSIS

Recommendation

We advise that you check for the source of water entry. Check seals and/or filters for points of contaminant entry. The air breather requires service. If unrated, we recommend that you replace with a suitable micron rated and/or desiccant air breather. If rated, we recommend that you service/replace the breather. We advise that you follow the water drain-off procedure for this component. We recommend an early resample to monitor this condition.

A Wear

Copper ppm levels are abnormal. Bearing wear is indicated.

Contamination

Free water present.

Fluid Condition

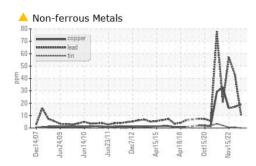

The AN level is acceptable for this fluid. The oil is no longer serviceable as a result of the abnormal and/or severe wear.
