

# **OIL ANALYSIS REPORT**

Ecole Grande Riviere #1 [GTT224-462 1-1P1M79P] **YORK SLEM926540** 

Componer

YORK TYPE K (--- GAL)

## DIAGNOSIS

### Recommendation

If not recently done change any filter driers to reduce moisture level. We recommend an early resample to monitor this condition.

All component wear rates are normal.

## Contamination

The elevated moisture content is associated with POE oils which are hygroscopic, and can absorb moisture from sampling and processing.

### **Fluid Condition**

The AN level is acceptable for this fluid. The condition of the oil is suitable for further service.
