

OIL ANALYSIS REPORT

Sample Rating Trend

SAMPLE INFORMATION method

Componer Chiller

Area

YORK TYPE K (--- GAL)

U	IAGI	10313	

Recommendation

If not recently done change any filter driers to reduce moisture level. We recommend an early resample to monitor this condition.

Wear

All component wear rates are normal.

Contamination

The elevated moisture content is associated with POE oils which are hygroscopic, and can absorb moisture from sampling and processing.

Fluid Condition

The AN level is acceptable for this fluid. The condition of the oil is suitable for further service.
