DIAGNOSIS

Recommendation

We recommend an early resample to monitor this condition. Advise you send the oil filter for a more detailed analysis of the wear situation that is occurring in this component.

Wear

All component wear rates are normal.

Contamination

There is a high amount of particulates present in the oil. Sample is layered with different type/density of oil.

Fluid Condition

The AN level is acceptable for this fluid. The condition of the oil is suitable for further service.
