Pump Fluid NOT GIVEN (--- LTR)

DIAGNOSIS

Recommendation

We advise that you check for the source of water entry. Resample at the next service interval to monitor.

🔺 Wear

The copper level is abnormal. All other component wear rates are normal.

Contamination

There is a moderate concentration of water present in the oil. The amount and size of particulates present in the system are acceptable. Chlorine 134 ppm.

Fluid Condition

The AN level is acceptable for this fluid. The AN level is acceptable for this fluid. The condition of the oil is suitable for further service.
