HISTORICAL DIAGNOSIS

08 Mar 2023 Diag: Doug Bogart

ISO

Resample at the next service interval to monitor.All component wear rates are normal. There is a moderate amount of particulates present in the oil. The pH level of this fluid is within the acceptable limits at 7.0. The condition of the oil is acceptable for the time in service.

view report

06 Oct 2022 Diag: Doug Bogart

NORMAL

Resample at the next service interval to monitor.All component wear rates are normal. There is no indication of any contamination in the oil. The amount and size of particulates present in the system are acceptable. The pH level of this fluid is within the acceptable limits at 7.0. The condition of the oil is acceptable for the time in service.

view report

31 May 2022 Diag: Doug Bogart

PH

Resample at the next service interval to monitor.All component wear rates are normal. There is no indication of any contamination in the oil. The amount and size of particulates present in the system are acceptable. The pH is low at 6.0. The condition of the oil is acceptable for the time in service.

DIAGNOSIS

Recommendation
We recommend you service the filters on this component. Resample at the next service interval to monitor.

Wear
All component wear rates are normal.

Contamination
There is a high amount of particulates present in the oil.

Fluid Condition
The pH level of this fluid is within the acceptable limits. The condition of the oil is acceptable for the time in service.
