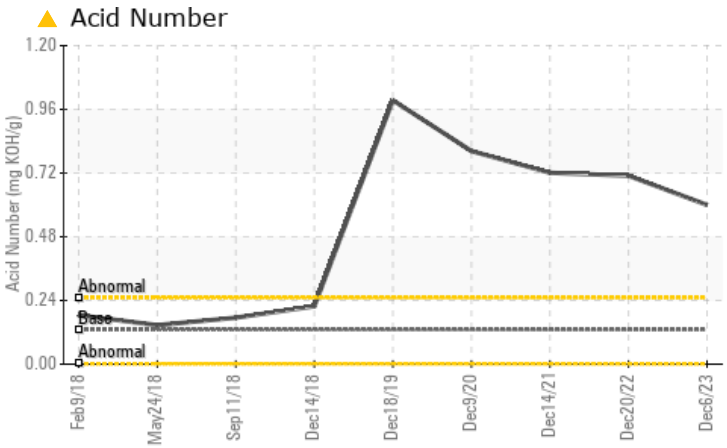
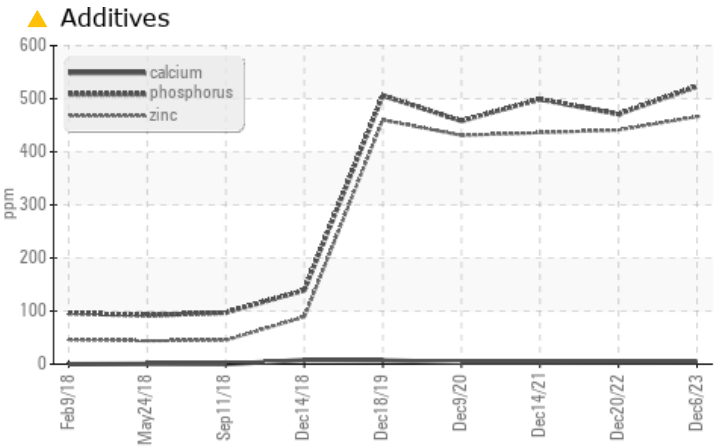
COMPONENT CONDITION SUMMARY





RECOMMENDATION

Oil profile does not match the reference oil on file. Please provide a reference oil sample for the lab to test against. No other action required at this time. Resample at next normal interval.

RECOMMENDED ACTIONS

There are no recommended actions for this sample.

HISTORICAL DIAGNOSIS

20 Dec 2022 Diag: Mike Johnson

DEGRADATION

Oil profile does not match the reference oil on file. Please provide a reference oil sample for the lab to test against. No other action required at this time. Resample at next normal interval.Wear Particles are low and acceptable. Contamination is low and acceptable. Some light debris was found in the sample. Fluid health indicators are steady when compared with previous samples, but can be verified with a reference sample on file.

view report

14 Dec 2021 Diag: Mike Johnson

DEGRADATION

Confirm that reference oil is correct. The additive profile does not match the oil on file, but are consistent with previous samples. Resample at next normal interval and indicate exact oil used on label.Wear particles are low and acceptable. Particle contaminants are low and acceptable. Fluid additives are not consistent with reference oil on file. Additives are consistent with previous sampling.

view report

09 Dec 2020 Diag: Mike Johnson

DEGRADATION

Wear rate is low nd steady. PQ (large bits of ferro-magnetic) reading is still elevated, but is steady. No further action at this time. Continue to monitorWear rate is low and steady. Contaminant level (particulate, moisture) is low an appropriate. Fluid health indicators suggest that the oil is acceptable for continued use. There appears to still be additive mixing in this drive which can influence the AN values, giving misleading indictors of failing oil health. Please VERIFY that the oil in use is properly noted on the submission form when sending in a sample.

DIAGNOSIS

Recommendation
Oil profile does not match the reference oil on file. Please provide a reference oil sample for the lab to test against. No other action required at this time. Resample at next normal interval.

Wear
Wear Particles are low and acceptable.

Contamination
Contamination is low and acceptable.

Fluid Condition
Fluid health indicators are steady when compared with previous samples, but can be verified with a reference sample on file.
