

OIL ANALYSIS REPORT

RIG 816 R816-MP-02-AFT2

Component

Gearbox

GEAR OIL ISO 320 (--- GAL)

DIAGNOSIS

Recommendation

We advise that you check for the source of water entry. We recommend that you drain the oil from the component if this has not already been done. We recommend an early resample to monitor this condition.

Wear

All component wear rates are normal.

Contamination

Appearance is unacceptable. There is a moderate concentration of water present in the oil. The high sodium (Na) level indicates the possible presence of salt water.

Fluid Condition

The oil is no longer serviceable due to the presence of contaminants.
