## DIAGNOSIS

### Recommendation

No corrective action is recommended at this time. We recommend an early resample to monitor this condition.

Machine Id

#### 🔺 Wear

The aluminum level is abnormal. All other component wear rates are normal.

### Contamination

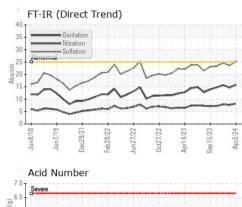

Elemental level of silicon (Si) above normal.

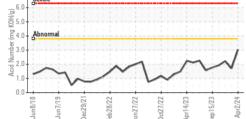

#### Fluid Condition

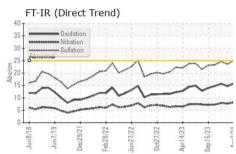

The BN result indicates that there is suitable alkalinity remaining in the oil. The AN level is acceptable for this fluid. The condition of the oil is suitable for further service.
