

## **OIL ANALYSIS REPORT**

Area SCHTRUCK **6429 [SCHTRUCK]** 

**Diesel Engine** 

Fluic PETRO CANADA DURON SHP 15W40 (10 (

## DIAGNOSIS

### Recommendation

Resample at the next service interval to monitor.

#### Wear

Metal levels are typical for a new component breaking in.

## Contamination

Elevated aluminum (Al) and/or lead (Pb) and potassium (K) levels in your metals analysis are likely a result of solder flux release into the lubricant and is common on new equipment/components. There is no indication of any contamination in the oil.

## Fluid Condition

The BN result indicates that there is suitable alkalinity remaining in the oil. The condition of the oil is suitable for further service.
