DIAGNOSIS

Recommendation

The oil is near the end of its useful service life and we recommend schedule an oil change. Resample at the next service interval to monitor.

Wear

An increase in the aluminum level is noted. All other component wear rates are normal.

Contamination

There is a moderate amount of silt (particulates < 14 microns in size) present in the oil.

Fluid Condition

The AN level is at the top-end of the recommended limit. Confirm oil type.
