

OIL ANALYSIS REPORT

Machine Id INGERSOLL RAND NORTH I/R (S/N VK4104U16299) Component Air Compressor

Fluid USPI AIR 46 (--- GAL)

DIAGNOSIS

Recommendation

We recommend you service the filters on this component. Resample at the next service interval to monitor. We were unable to perform a particle count due to metal particles present in this sample.

🔺 Wear

Moderate concentration of visible metal present. All component wear rates are normal.

Contamination

There is a light concentration of water present in the oil.

Fluid Condition

The oil viscosity is higher than normal. This plus the additive levels indicates the addition of a different brand or type of oil. Confirm oil type. The AN level is acceptable for this fluid.
